

Turnkey Engineered Solutions

Cost & Constructability Guaranteed

PRES Energy, a Stark Tech Group Company, provides customized turnkey solutions. PRES engineering is the single agent working with the building owner through design, design build, retrofit and other projects to customize solutions from concept to design to implementation, construction and dynamic commissioning.

We specialize in:

- MEP Engineering
- Project Management
- Construction Management
- Energy & Sustainability
- Dynamic Commissioning

Stark Tech Group is comprised of long-standing, reputable business units with expertise in integration, equipment, building intelligence and implementation. Together and individually, Stark is focused on providing excellent service to the end user.

Stark is an intelligent building solutions company with a unique ability to work across applications or independently with the end-user.

PRES collaborates with the building owner to customize a solution that future proofs the space. The PRES turnkey approach enables more control over timing and cost and minimizes redundant mark ups. PRES considers more factors than just energy usage. During conceptual planning, PRES evaluates tenant expectation, maintenance, differential maintenance plans, building mission and overall technology roadmap to achieve **Total Facilities Optimization**.
